

5 DAYS

Certificate in Mine Environmental Control / Occupational Hygiene - Paper 1 (Fluid Flow Dynamics - Fans and Mine Water)

UMOYA
VOHE SOLUTIONS

Ventilation & Occupational
Hygiene Engineering

Course Outcomes

The participant will be able to:

- Perform integral calculations pertaining to all aspects of the subject matter
- Comment on all aspects of the subject, recognise and utilise laws and formulae used for specific calculations
- Identify and state corrective action for anomalies, record and report on all measurements relevant to subject

Course Contents

- Fan efficiencies and pulley sizes
- Basic fan curves
- The effects of densities, fan speed, evaseé, and natural ventilation on fan performance
- Fans in series and parallel
- Residual curves
- Water quality
- Water reticulation systems
- Water pumps
- Energy recovery systems

Target Participants

- Candidates studying towards the Certificate in Mine Environmental Control

Prerequisites

- Full Intermediate Certificate in Environmental Control
- 12 Months relevant experience (6 months for graduates) in the Environmental Control / Occupational Hygiene Department

Course Dates

Refer to
Course Schedule Dates
(Available on Request)
